ARM DETAIL: top view

ARM DETAIL: front view with grating

ARM DETAIL: front view with grating, grating jig

GRATING ALIGNMENT JIG:

To be used while gluing grating to grating arm, to allow positioning of "floating" grating at correct height above arm lip. Insert dowel pin or small Allen wrench through jig and grating arm to hold jig in place while gluing

Material: 6061-T6 aluminum

P: 1 x 4/40 thru, for dowel pin to aid jig positioning

(Dimensions measured from lower left hand corner of cavity body)
